

EXPLORE SCIENCE, DON'T BELIEVE IN IT, SAYS JAGGI

**DC CORRESPONDENT
CHENNAI, JAN.4**

Godman Jaggi Vasudev on Wednesday exhorted youngsters to explore science and not believe it.

Addressing students on the topic "Inner Engineering - Technologies for Well Being" at SRM University on the outskirts of the city, Jaggi Vasudev said youngsters need to explore things and should not believe it as belief is to just to assume that it was absolutely right.

"You need to constantly explore yourself to see God and it is not easy you have to keep exploring until you see it for yourself", he said.

Responding to a student's question about reincarnation, the godman said that every person needs to explore his inner soul to find out an answer for it.

To another question, he said military becomes the biggest beneficiary of every technological development and arms sector has become the largest industry in the world which in turn had become the main reason for conflicts across the world.
